About Me

Grounded and solution oriented Computer Science Engineer who loves coding with professional experience in Web development. Looking for a role where I utilize my skills for the betterment of the company whilst also learning and improving my skills in the field.

Professional Experience/ Projects

Anusha Natural Nourishment(Free Lancer)

Worked as a Full Stack Developer for a Zirkaapur based health food startup.

Key Responsibilities:-

- Developed an E-Commerce Website
- Handled the Marketing and SEO for the Website

Sign Language Recognition System

Developed a Sign Language Recognition System using Python language and Artificial Intelligence and Machine Learning as the technologies behind the project. The System uses the webcam to identify the sign language/gestures made by the person and converts it into the English alphabet letters. This system was developed to help deaf and mute people to converse with people around them.
